

Someone asking for money or to share sensitive information?

1**Open Wcall during the call.**

Take a breath — you don't need to hang up to check.

2**Find who they claim to be in Wcall.**

Use the contact you saved yourself, never a number they give you.

3**Send a check.**

They confirm the push notification or read the SMS code back to you.

4**No confirmation? Hang up.**

Likely a scam. Don't send money or share sensitive info.

This is not rude.

Careful people check first. Every single time.
